*June is the perfect time to visit New York City, not too hot and before the summer rush. Our tour offers up many interesting photo opportunities while visiting the city.*

*In the photography world there is no such thing as a New York minute, there's just too much to see and capture. Most tours offer two nights in the city and we felt it was not enough when traveling so far.*

*"As a special feature of this special New York Weekend, we will be joined by photographer B. D. Colen, who for the past 16 years has been teaching documentary photography at the Massachusetts Institute of Technology (MIT), in Cambridge, Massachusetts. Colen spent 10 years working on a project on Boston subway riders, has worked for NGOs in Haiti and Liberia, and has had work published in numerous US newspapers and magazines. For those of you interested in "street photography," having him with us in the international street photography capital should be a real treat."
